ASIA GARDENS
GREEN SPIRIT

SUSTAINABLE EVENTS

At Asia Gardens Hotel & Thai Spa we dedicate all our efforts to achieving our goal of conserving and protecting the environment. To this end, we are firmly committed to quality and the implementation of alternative systems and methods for:

- ♦ Reducing water and electricity consumption
- ♦ Selective waste collection
- ♦ Using eco-friendly products

Symbolising purity and life, the water in the lakes where fish swim and water lilies float reminds us how small daily decisions can make a real difference.

- ♦ Over 1,200 solar panels provide the equivalent of 40% of the hotel's electricity consumption.
- ♦ Guests can discover, on a guided tour, more than 300 species of Asian vegetation, starting with the spectacular Macro Bonsai, over 200 years old.
- ♦ Water is recycled and desalinated for use in irrigating the gardens, ponds and waterfalls.
- ♦ Geothermal energy is used to heat some of the pools.
- ♦ The hotel has more than 10,000 m² of lawn, which absorbs around 900 kg of CO per year, providing enough oxygen for 170 people per day.

The image shows an outdoor dining area with several round tables set for a meal. The tables are covered with white tablecloths featuring a large green tropical leaf pattern. Each table is surrounded by white Chiavari chairs. The tables are elegantly set with white plates, silverware, glassware, and folded green patterned napkins. A tall, clear glass vase filled with water and greenery, topped with a large white orchid, serves as a centerpiece. In the background, a swimming pool with clear blue water is visible, bordered by a wooden railing. Beyond the pool, there is a dense tropical garden with various palm trees and lush greenery. To the left, a traditional thatched-roof pavilion is partially visible. The sky is clear and blue, suggesting a bright, sunny day.
